

On June 28<sup>th</sup> 2019 around 10 PM at night I experienced a low level mist; or maybe a cloud about 10 feet off the ground coming rolling in and then seating itself inside the stadium and simultaneously behind the fence and the tree line. There were many etheric martians, who I am able to “see hear and touch” but are beyond the range of your human 5 senses. This is because a certain amount of martian DNA has been added to my biology. If I would have had a Infrared or Night Vision camcorder; or maybe a EMP recorder, I could have documented what I experienced. As some of you may know I have been in a ET breeding program since 2013. The reason for this is to prepared the public for Master Maitreya's speech at the UN. On that day of days he will mentally overshadow all of humanity simultaneously and everyone over the age of 14 will hear and see him inwardly, telepathically, in their own language. Thousands of miraculous Healings around the world will take place on that day so as to provide our scientists with hard proof that the event actually happened. Master will outline the future life and past history for humanity and make his appeal for justice and sharing as the only way for world to move forward. My family briefed me that this video I shot was coming. They notify me before hand. Also, I have edited this video because it was way to long to watch and people get bored easily. I tied to keep in down to a minuet or so. I will also state that it was a cloudless night. But I can not prove that because my camcorder only show black when I tried to focus on the sky at night. As always, take everything I say with a grain of sand. You must find your own way to your own truths.
